

Vacancy for:
**Junior Software Developer:
Systems Integration**

www.techairos.com

Techairos Consulting is a small IT company that specialises in providing solutions where several technologies are integrated together.

We are looking for candidates with Computer Science or Engineering degrees.

Job description

You will be given responsibilities on a variety of projects, depending on your skills and experience.

Possible tasks may include:

- **Software development** (various languages, various applications)
- **Information systems design** and integration, e.g.:
 - Gathering data on mobile devices
 - Feeding into a central database
 - Live information feeds/streams
- **Linking data streams** and servers using tools like OpenFn
- **Data server** setup, integration and management

Apply if you are:

- A **South African citizen**
- Available to attend interviews **in Stellenbosch in person** at short notice (please indicate your current city/town of residence specifically in your application e-mail)
- Early in your career, or a recent graduate, or graduating soon
- Eager to gain experience in systems design and integration, and different software languages
- Excited by the idea of linking different online services and leveraging their APIs to create new useful, efficient ways to use them
