

S-PLANE Automation (Pty) Ltd

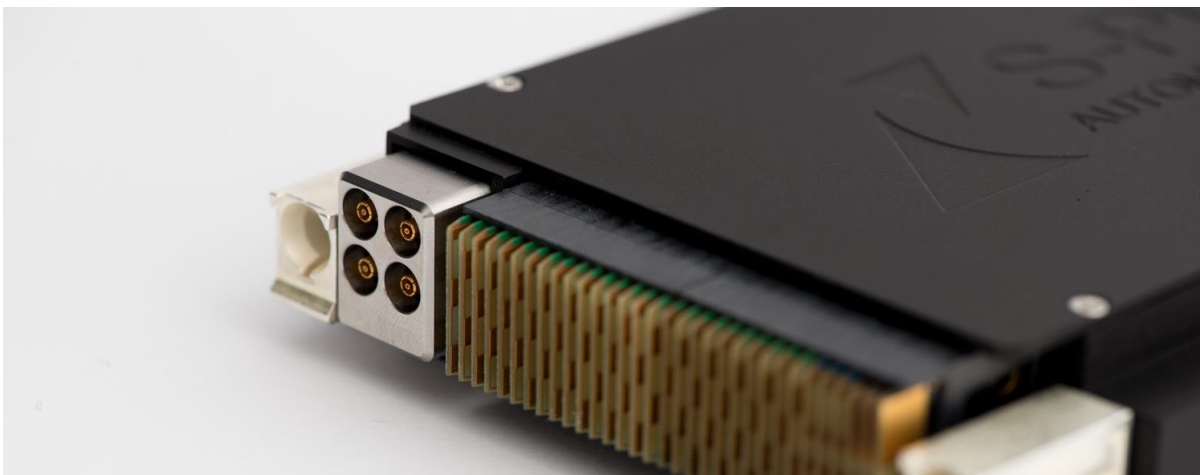

Automation Innovation

S-PLANE is an internationally recognised aerospace and defence company specialising in product supply and development of autonomous systems and related subsystems. Our focus is fixed- and rotary-wing UAVs and their navigation, flight control and mission management subsystems. Product and development scope spans both the civil and military UAV markets, and also extends to autonomous land, sea-surface and underwater vehicles and their subsystems.

S-PLANE is expanding its workforce to meet the ever growing demands of the autonomous and unmanned systems industry. S-PLANE invites qualifying candidates to submit their applications for the following technical position:

EMBEDDED DESIGN ENGINEER

- Minimum Qualification: Bachelor's Degree in Electronic Engineering
- Minimum 2+ years of relevant industry experience, ideally 5+ years
- Skills: C Programming, VHDL, RTOS/OS experience
- Other beneficial skills
 - Aerospace industry exposure
 - Drivers & BSP experience
 - Safety critical design (DO-178C)
 - Electronic design, including high-speed (PCIe, SATA, Ethernet)

Qualifying candidates should email their CVs, a letter of reference and tertiary academic records to careers@s-plane.com. Visit our website for further company information.
