

## S-PLANE Automation (Pty) Ltd

*Automation Innovation*

S-PLANE is an internationally recognised aerospace and defence company specialising in product supply and development of autonomous systems and related subsystems. Our focus is fixed- and rotary-wing UAVs and their navigation, flight control and mission management subsystems. Product and development scope spans both the civil and military UAV markets, and also extends to autonomous land, sea-surface and underwater vehicles and their subsystems.

S-PLANE is expanding its workforce to meet the ever growing demands of the autonomous and unmanned systems industry. S-PLANE invites qualifying candidates to submit their applications for the following technical position:

### SOFTWARE DEVELOPER

- Minimum Qualification: Bachelor's Degree in Computer Science or Engineering
- 2+ years of relevant industry/postgraduate experience (working in a team, exposure to task tracking software and code collaboration)
- Some experience in C++
- Other beneficial skills
  - C#, XAML
  - Linux
  - REST Interfaces
  - Python
  - C++11

Qualifying candidates should email their CVs, a letter of reference and tertiary academic records to [careers@s-plane.com](mailto:careers@s-plane.com). Visit our website for further company information.
